Department of Biochemistry

Course outcome

1. To know the functional groups, hydrophobic and hydrophilic moieties and weak valence forces that organize macromolecules.
2. To know the metabolic processes emphasising on the overall change, interdependence and molecular turnover.
3. To know the metabolic regulations with the help of hormonal action, second messengers and regulation of enzyme activities.
4. To know about the biochemical genetics and molecular biology.
5. To know about the vitamins, antimetabolites, enzymes and enzyme inhibitors at this stage which will provide a basis for the future study of medical subjects.
6. To know important organ function tests.
