Sir,

Ref: Clinical study for Mouth Wash

Greetings from Rajiv Gandhi Centre for Biotechnology (RGCB).

I am writing this mail in connection with a new formulation developed jointly by RGCB and RCC for radiation induced oral mucositis. A clinical trial for the same was done at Regional Cancer Centre in 2016 and the study outcome was found very encouraging. Accordingly a patent disclosure was filed and is under scrutiny and examination.

Meanwhile, we approached Kottakal Arya Vaidyasala (AVS) for exploring the possibility of bringing this product into the market for common cancer patients. The AVS team is of the opinion that the acceptability of this product will be much better if we can increase the spectrum of the mouthwash by conducting a small bridging study to show its efficacy for mouth ulcers and as well as a regular mouth wash.

We would be most obliged if the PMS team can help is in doing this bridging study. My colleagues have had detailed discussions with Dr. Ambili and Dr. Mathew for taking up the study at PMS, as you have enough number of OP patient population. Kottakal has agreed that they will be able to support this study by giving all the study material along with service of an Ayurveda doctor if necessary.

We will appreciate your help and support in bringing this product to market and help the general population by considering the conduct of this study proposal. RGCB will support all the off-line studies required in RGCB laboratory.

Warm Regards

Yours truly

The Health & Software Technologies Group of C-DAC, Thiruvananthapuram has been working on the development of **Maxillo Facial Surgery Planning and Simulation Software project funded by Ministry of Electronics and Information technology, Govt. of India (MeitY)**. The software has Digital Cephalometry Analysis and 3D simulation modules which requires extensive evaluation from medical experts to arrive at the market ready product.

Dr. Adersh and team from PMS College of Dental Sciences & Research played a significant role in evaluation of Maxillo Facial Surgery Planning and Simulation Software in all aspects including the dimensional accuracy of Cephalometry analysis. We really appreciate the effort of Dr. Adersh and team put for the evaluation of the software. We are also in active discussions with Dr. Adersh for submitting multiple proposals in Dentistry to MeitY, GoI for financial support.

Sub: Reg. Collaborative Development of Cost effective Bionic Arm

Sir,

At the onset, I would like to thank you for discussions we had during Feb-Mar 2021 regarding need for development of prosthetic limb where you had demonstrated working prototype of upper prosthetic arm developed using Gyro Sensor.

We had further explored the need and market for such a system. As per the study it has been evident that lack of research and indenisation in the area resulted in increased cost and systems available were not functional enough to assist routine activities of the individual.

C-DAC(T) has allocated Rs. 19.00 Lakhs, from internal funds, for project **Indigenised Cost Effective Bionic Arm** with the objective of developing a prototype for BCI based Bionic Arm.

Going forward C-DAC(T) would like to continue the collaboration with you and PMSCDSR in similar areas.
