## Department of Oral Medicine & Radiology

### INFLAMMATORY FIBROUS HYPERPLASIA : A CASE REPORT

A 54 year old female patient , reported to the Department of Oral Medicine & Radiology , PMS College of Dental Science & Research with Chief complaint of a growth in the maxillary residual ridge with a duration of one year. The swelling was slowly growing and associated with pain only during brushing.

On intra oral examination the maxillary arch is completely edentulous and wearing complete denture for past one year. While wearing the denture it impinges the growth.

The biopsy report confirmed the diagnosis as inflammatory fibrous hyperplasia

## Department of PUBLIC HEALTH DENTISTRY

### ELIXIR, Blood donation Drive, 2021

**Amidst this pandemic, there has been a huge inflow of patients suffering from various diseases and conditions which declined the willingness of people to donate blood.**

**In the meantime, the need for blood has increased more than usual, which highlights the importance of donating blood.**

**“Blood donation is all about giving life to other people”**

**The Department of Public Health Dentistry, the faculties of other fraternities, students, in association with NSS and Alumni of PMS College of Dental science and Research took the initiative to organise a Blood Donation Drive in the college premises, on 09.12.2021**
